Notes: FY is fiscal year. Excludes Medicaid-expansion CHIP and the territories. Beneficiaries (enrollees for whom payments are made) are shown here because they provide the only historical time series data directly available before FY 1990. Most current analyses of individuals in Medicaid reflect enrollees. For additional discussion, see <https://www.macpac.gov/macstats/data-sources-and-methods/>. The increase in FY 1998 reflects a change in how Medicaid beneficiaries are counted: beginning in FY 1998, a Medicaid-eligible person who received only coverage for managed care benefits was included in this series as a beneficiary.

Children and adults who qualify for Medicaid on the basis of a disability are included in the disabled category. In addition, although disability is not a basis of eligibility for aged individuals, states may report some enrollees age 65 and older in the disabled category. For FYs 1975–2013, this exhibit does not recode individuals age 65 and older who are reported as disabled, due to lack of detail in the historical data (unlike the majority of MACStats). Due to the way eligibility is reported in Transformed Medicaid Statistical Information System (T-MSIS), age must be used to separate beneficiaries eligible on the basis of age from those eligible based on disability. This means that the beneficiary count for the disabled category in 2018 and subsequent years no longer includes anyone age 65 and older. Generally, individuals whose eligibility group is unknown are persons who were enrolled in the prior year but had a Medicaid claim paid in the current year.

For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification (ID) number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and gender. The national enrollment counts shown here are unduplicated using this national ID.

¹ Includes the new adult group made eligible under Section 1902(a)(10)(A)(i)(VIII) of the Social Security Act by the Patient Protection and Affordable Care Act (P.L. 111-148, as amended).

² Due to the transition from the Medicaid Statistical Information System (MSIS) to T-MSIS, complete and valid data are not available for all states for several years. We jumped to FY 2018 because this was the most complete year of data available to develop our MACStats exhibits.
