EXHIBIT 14. (continued)

Notes: FY is fiscal year. Enrollment numbers generally include individuals ever enrolled in Medicaid-financed coverage during the year, even if for a single month. However, in the event individuals were also enrolled in CHIP-financed Medicaid coverage (i.e., Medicaid-expansion CHIP) during the year, they are excluded if their most recent enrollment month was in Medicaid-expansion CHIP. Numbers exclude individuals enrolled only in Medicaid-expansion CHIP during the year and enrollees in the territories. Additionally, figures shown here may not be directly comparable to prior years due to differences in reporting between the Transformed Medicaid Statistical Information System (T-MSIS) and the Medicaid Statistical Information System (MSIS).

For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification (ID) number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and sex. The state and national enrollment counts shown here are unduplicated using this national ID. Categories may not sum to the total for each state due to rounding. In addition, the sum of the state totals exceeds the national total because individuals may be enrolled in more than one state during the year.

- Dash indicates zero; 0 indicates an amount less than 500 that rounds to zero.

¹ Children and adults under age 65 who qualify for Medicaid on the basis of disability are included in the disabled category. Individuals age 65 and older eligible through an aged, blind, or disabled pathway are included in the aged category.

² Dually eligible enrollees are covered by both Medicaid and Medicare. Those with limited benefits receive only Medicaid assistance with Medicare premiums and cost sharing.

³ Includes both newly eligible and not newly eligible adults who are eligible under Section 1902(a)(10)(A)(i)(VIII) of the Social Security Act (the Act). Newly eligible adults include those who are not eligible for Medicaid under the rules that a state had in place on December 1, 2009. Not newly eligible adults include those who would have previously been eligible for Medicaid under the rules that a state had in place on December 1, 2009; this includes states that had already expanded to adults with incomes greater than 100 percent of the federal poverty level as of March 23, 2010, and receive the expansion state transitional matching rate.

⁴ Includes adults under age 65 who qualify through a pathway other than disability or Section 1902(a)(10)(A)(i)(VIII) of the Act (e.g., parents and caretakers, pregnancy).

⁵ State has a state plan amendment (SPA) that allows the state to receive the enhanced federal medical assistance percentage (FMAP) for Medicaid children who would have, before January 1, 2014, been enrolled in CHIP if not for the elimination of the Medicaid asset test. These children cannot be separately identified in the T-MSIS data. Because the state claims the spending for these children as Medicaid-expansion CHIP, we reduced child enrollment and spending in these states based on the proportion reported in their SPA. Correspondingly, we reduced California's child enrollment by approximately 261,700, North Dakota's child enrollment by approximately 3,200, and Utah's child enrollment by approximately 12,800.

⁶ State reported enrollment for the new adult group that shows a difference of greater than 20 percent when compared to the CMS-64 enrollment report. The District of Columbia's average monthly enrollment was 34 percent less than the benchmark, Illinois's average monthly enrollment was 108 percent more than the benchmark, and Missouri's average monthly enrollment was 33 percent more than the benchmark.

⁷ State reported a large shift of enrollees between eligibility groups. Missouri reported a 355 percent increase in the new adult group and a 15 percent decrease in the other adult group.

⁸ State reported enrollment for the new adult group even though it had not expanded coverage in FY 2022.
