EXHIBIT 5. (continued)

Notes: SFY is state fiscal year. Total budget includes federal and all other funds. State-funded budget includes state general funds, other state funds, and bonds. Other state funds are amounts from revenue sources that are restricted by law for particular government functions or activities, which for Medicaid includes provider taxes and local funds. Medicaid, elementary and secondary education, and higher education represent the largest total budget shares among functions broken out separately by the National Association of State Budget Officers (NASBO). Functions not shown here are transportation, corrections, public assistance, and all other (includes hospitals, economic development, housing environmental programs, CHIP, parks and recreation, natural resources, and air and water transportation). Medicaid spending amounts exclude administrative costs but include Medicare Part D phased-down state contribution (also referred to as clawback) payments.

¹ Total and state-funded budget shares should be viewed with caution because they reflect varying state practices. For example, in Ohio, federal reimbursements for Medicaid expenditures funded from the General Revenue Fund (GRF) are deposited into the GRF. In prior reports, this practice made Ohio's general revenue expenditures look higher and conversely made its federal expenditures look lower relative to most other states that do not follow this practice. In the 2021–2023 report, NASBO removed the federal funds from the GRF number to be consistent with budget presentations in other NASBO surveys, and thus, Ohio's state-funded Medicaid spending is less than what was reported in prior years. In addition, in many states, some functions—particularly elementary and secondary education—may be partially funded outside of the state budget by local governments.
